## Why should I use the G-Cloud?

Software Support - 2014-04-28 - in G-Cloud

For UK Public Sector organisations, the G-Cloud is the most cost-effective way for procuring cloud-based services. The procurement framework provides a call-off contract of pre-approved services, allowing you to order just what you need as and when you need it, with no practical upper limit on contract value.

This procurement route also provides the extra protection of the G-Cloud Framework Agreement between Kahootz and the Minister of the Cabinet Office, ensuring we deliver a quality service to your organisation.
